FRONTEND DEVELOPER

EDUCATION

TILAK MAHARASHTRA VIDYAPEETH   **September 2021 – May 2024**
Bachelor of Computer Applications

EXPERIENCE

SensixTech Private Limited || React Developer   **September 2024 - Present**

- Developed and maintained web and mobile applications using **React, Next.js, and React Native**, delivering cross-platform solutions.
- Built dynamic and responsive user interfaces for diverse projects, including a **dating application, trading academy platform**, and other custom web applications.
- Collaborated with cross-functional teams to design, develop, and deploy scalable front-end features, ensuring seamless integration and user experience.
- Implemented reusable components, optimized rendering performance, and adhered to best practices to ensure consistency across platforms.
- Contributed to the architecture and UI/UX design of interactive pages, enhancing usability and maintaining modern design standards.

Techverden || Full Stack Developer   **Jul 2024 - March 2025**

- Developed and implemented a reusable front-end component library using technologies like React, NextJS and React Native, improving interface consistency and accelerating development across projects.
- Designed and built responsive user interfaces for a web application using React, enhancing usability and visual appeal across devices.
- Led front-end development for a new e-commerce website, improving navigation, layout, and overall user journey to boost engagement and retention.

SKILLS

- **Frontend Development:** React.js, React Native, Next.js, JavaScript, HTML5/CSS3, Tailwind CSS
- **Tools & Technologies:** Figma, WordPress, Git, GitHub, Firebase

PROJECTS

Settler – Scalable Expense Management Application   **React Native & Figma Designer**

- Built a high-performance expense tracking platform to manage personal and group finances.
- Enabled users to manage multiple bank accounts and track individual transactions.
- Developed role-based profiles tailored for students and professionals, each with customized features.
- Implemented group expense splitting, allowing real-time balance updates, shared costs, and expense tracking across user groups.

Talk-A-Tive – Full-Stack Real-Time Chat Application   **React JS & Node JS Language**

- Developed a real-time chat application using Socket.io for instant messaging, typing indicators, and notifications.
- Built the front-end using React.js for a dynamic and responsive user interface.
- Created the back-end with Node.js and Express.js, enabling scalable API architecture.
- Implemented MongoDB for efficient data storage and retrieval of chat histories and user metadata.

E-Commerce Online Shopping Website   **React JS & Node JS Language**

- Designed and implemented product cart management, form validation, and user experience enhancements for a seamless shopping experience.
- Managed server-side operations using Node.js, enabling smooth front-end and back-end communication.
